

EDUCATION

Carnegie Mellon University
Master of Human-Computer Interaction (HCI)
3.9 GPA
Aug. '25 - Aug. '26

University of California, Santa Barbara
B.S. in Computer Science, Minor in Statistical Science
3.75 GPA
Sep '21 - Jun '25

SKILLS

Visual Design, UI/UX Design, User-Centered Design, Interaction Design, Design Systems, Components, Mockups, Wireframing, User Flow, UX Research, Usability Testing, Accessibility (WCAG), Prototyping, Design Documentation, A/B Testing, Journey Mapping, Digital Product Strategy, Information Architecture, Computer Vision, Data Science

PROGRAMMING LANGUAGES

Python, C++, Java, HTML/CSS/ Javascript, TypeScript, Bash, R, SQL

TOOLS & FRAMEWORKS

Figma, Adobe Suite, Cursor, Codex, Claude Code, React, Tailwind CSS

EXPERIENCE

Collier Township (Capstone)
Designer & Engineer Lead

Jan '26 - Jul '26

- Centralized a 9k-resident township’s civic feedback and policy-making system, improving transparency and trust
- Raised average comprehension of policy decisions, legal constraints, and budgeting with low tech-literate residents by 44%
- Built AI aid to retrieve and analyze civic data, cutting time by 50% for drafting new policies and grant proposals
- Validated product through 155 user tests, 30 qualitative interviews, 39 survey responses, and 6 in-person field visits across 13 iterations and 4 stages of research and design

PLUS Tutoring

Product Design Intern

Jan '26 - Present

- Designing end-to-end design process of 4 feature flows for a tutoring platform of 3,000+ students and 500+ tutors
- Delivered high-fidelity interfaces and published visual design system documentation to streamline better session details access for tutors

Dawdle AI

Sole UI/UX Design Intern

Jun '25 - Aug '25

- Designed anti-procrastination mobile app with AI coaching and productivity timers, delivering 30+ screens shipped to App Store with 200+ users and 5-stars on launch
- Built 40+ component design system in Figma reducing design-to-dev iteration cycles

JAFFX

Founding Designer & Frontend Engineer

Oct '24 - Aug '25

- Secured \$7,500, placed 2nd out of 44 teams at UCSB New Ventures Competition
- Established brand identity from scratch (logo, typography, color, and system)
- Developed company website (**Next.js & React**)

Lorentz Solution

Software Engineer Intern

Jun '24 - Aug '24

- Migrated 44 dynamic libraries from compiler RHEL6 to RHEL78 (Bash scripting)
- **Reduced 10%** in backup and production release package storage by automating library clean-up process

UCSB emLab, Human-Wildlife Conflict

ML Data Scientist Research Fellowship

Jun '24 - Aug '24

- 3rd-authored research paper (published in **PNAS Nexus**) on climate-driven human-elephant conflict in Namibia
- Built and tuned **habit suitability machine learning models** with land cover data and bioclimatic variables to visualize how climate change drives human-elephant conflict in R

PROJECTS

Drawing with Fourier Epicycles | Math Visualizer

Feb '26 - May '26

- Created an interactive explainer teaching Fourier transforms, letting users play with frequency, amplitude, and phase in real time to watch math draw art, published to Medium

Refract | Anti-deepfake ID Theft ML UI

Jan '24 - May '24

- Built AI model and app (Tailwind/Javascript/CSS, Figma) that disrupts identity-theft deepfakes model training by **70%**, made research poster winning 2nd in annual showcase
